

“Downsize California NOW!”

MAJOR ANNOUNCEMENT...!

“Citizens for Saving California Farming Industries” is kicking off the drive to place the “measure” to split California into two states on the November 2010 ballot. In many instances, politicians and voters from LA County and the Bay Area dictate our farm policy. More often than not, these policies are not good for California Agriculture. Water usage is a perfect example. We have tens of thousands of farm workers out of work and hundreds of thousands of the best farm land in the country lying barren, because of our water policies. ***That’s CRAZY!!!***

It will happen again and again to our farmers and ranchers on dozens of other issues if something is not done. Powerful liberal, social and political forces inside and outside the state will continue to propose measures harmful to agriculture and our everyday lives.

No other region in the world has the capability of producing the variety of agriculture commodities as California. We must not allow the short-sightedness of our metropolitan politicians and its voters to destroy an irreplaceable industry!

It’s time to change this NOW!!!

The 1977-78 California budget was 14 billion dollars. Today our budget is nearly 150 billion dollars. Since 1978 our population has increased 68%.

Our budget has increased over 1000%. That is more than 10 times!!

PEOPLE, THAT’S INSANE!! We need to downsize California NOW!!

The benefits would be colossal!

Picture a State where the farmers and ranchers have all the water they need and put back to work the tens of thousands of farm workers that are out of work; a State where we can again feed the nation because all of our farm land is under production.

Picture a State where there are no personal or corporate income taxes or state inheritance taxes; a State with thousands of fewer

laws and regulations; a State where things can actually get done quickly without the hindrance of government and special interest groups. Picture a State where the border is truly controlled; a State with only one legislative body that meets no more than 3 months a year. Picture a State with much lower electric and gasoline cost and where the gas tax will actually be applied to road building and maintenance.

The bottom line is to picture a state where the bureaucrats and politicians work for us instead of the contrary; **a State that is truly people and business friendly and cares more about people than fish and bugs. THIS IS YOUR STATE!** This is the perfect time for change. **We are in the “Perfect Storm” to Downsize California NOW!!**

How Can You Help...? If you support this “GRASSROOTS” effort, please contact the numbers listed to volunteer your time. If you can, ***PLEASE*** make a donation! Any amount will be greatly appreciated!!
